CIO's Comments

Sampath Reddy, CFA
CIO, Bajaj Allianz Life Insurance

The domestic equity markets continued their upward momentum with the benchmark indices scaling new highs. The optimism on equities and economic growth coming back has been led by multiple factors, primary amongst them the hope of a stable, investment and investor-friendly government at the Centre. The Nifty and sensex are both trading at all time highs at levels of over 8100 and 27,000. At the end of Sept 2014, both have delivered a return in excess of 19% over the past 5 months since the start of the fiscal year.

The expectation of an economic recovery seems imminent over the coming few quarters. After two consecutive years of a sub 5% GDP growth (of 4.5% in FY13 and 4.7% in FY14), analysts expect a strong uptick in GDP growth in the coming couple of years. Government initiatives are resulting in reduction of Infrastructure bottlenecks which has the potential of unleashing a surge in investment activities. Also, the new Government is emphasizing on domestic manufacturing lead growth, which in turn can bring about a quantum jump in employment opportunities.

After a volatile and sharp depreciation in the currency over the last year, the Rupee is now stable at levels of 60. Falling crude oil prices which are at USD100 bode well for the overall wellbeing of the country as it would ease the pressure of the Current Account Deficit (CAD). The recent data on inflation which is on a deceleration trend is encouraging with the headline CPI inflation coming in lower at 7.80% in Sept 2014 compared to 7.96% in July 2014.

However, India is not out of the woods yet. While headline CPI inflation data offers comfort, the sticky food inflation is a cause of concern. At 9.22% in Sept 2014, food inflation is higher than the 9.14% in July 2014. The advancement of the monsoon has brought in relief, with the last available data placing deficit at 15% on an all India basis. However, as the monsoon has been delayed, patchy and uneven, this could put pressure on food prices though it would be much lower than initially estimated.

Markets have already rallied on the hope of a revival in the investment cycle, and expectations remain high. On the ground, though improvement in fundamentals would be a more gradual process and stock valuations run the risk of pushing ahead of fundamentals. Stock picking thus gathers paramount importance as one builds a portfolio of strong, solid companies that have emerged stronger in the face of a tough external environment. Sector-specific growth opportunities would need to be viewed in context of the quality of the balance sheet and the quality of the company's management to deliver

shareholder value. We remain optimistic on the prospects of the Indian economy over the coming few years.

The future for India is promising. Favorable demographics with a young workforce when led by a strong leadership can deliver good GDP growth. Investors can capitalize on this growth – with a smart stock-selection approach, and importantly, patience. As is said, "Patience always Pays".

Fund Manager Comments

RBI kept policy rates unchanged while maintaining a hawkish stance on upside risk to medium term inflation target. Headline CPI inflation moderated to 7.80% YoY in Aug from 7.96% YoY in July primarily led by fall in core inflation to all time low 6.83%. We would look to maintain duration within a range of 4.80-5.40 with a view that yields would stay range bound with a bullish bias given a stable INR, falling crude prices, lower supply and comfortable liquidity. Risks to our view are expectations of a US rate hike, rise in domestic food inflation and escalation in geopolitical tensions.

Fund Manager Comments

For third month in a row, markets continued its consolidation phase & ended flat (marginally down .5%) in the month of September 14. However performance across the sector was quite diverse. The larger theme was buying countercyclical & selling cyclical stocks. Hence Pharma, IT & to a limited extent FMCG stocks performed very well returning between 5-15%. Weakness in Re.w.r.t. US dollar helped this trend further towards exporting industries like pharma & IT. Final Supreme Court verdict on coal blocks that deallocated coal blocks allocated since 1994, hit hard metal & power stocks that were the primary recipients of these blocks. Banks were also hit hard on fears of their loans to these companies turning into non performing assets. We are selectively adding cyclical stocks & reducing defensives in our portfolio, hoping for a cyclical recovery over next 1 year.

Fund Manager Comments

Reflecting the mood in large caps, midcaps were also in consolidation mode. But unlike Nifty that was flat, midcap index NiftyM50 returned -3% in September 14. Here also stocks from Infra, Metal, banks (especially PSU banks), Capital Goods were hit hard on Supreme court verdict on coal block allocation. Pharma stocks, IT & FMCG stocks fared well returning 5-10%. Select oil & gas stocks also performed better on International oil prices falling further. Here also, we are selectively adding cyclical stocks & reducing defensives in our portfolio, hoping for a cyclical recovery over next 1 year.
