

## January 2018

The Union Budget FY19 was a balanced one with push to infrastructure and rural sectors. Also, there was no major impact on tax regime for insurance products, making them relatively more favourable from a taxation perspective. Soon the markets will digest the budget and move on to the key factor, i.e. corporate earnings growth. We feel that the worst is behind us, and expect earnings to pick up in H2FY18 and FY19, with earlier dragging sectors like pharma, IT and PSU banks contributing to the bounce-back. Another factor to look at is global markets, and how monetary policies of major central banks shape up over the coming months.
