

## May 2022

Corporate earnings have been exceptionally strong in FY21 & FY22, and are also expected to do well in FY23. Based on the projected earnings for FY23, market is trading at around 20x PE. Market valuation has moderated substantially due to recent correction, and is now trading below its long-term average. Even though the market valuation has come down significantly from earlier highs, there is still a possibility that it could further decline in near term. Hence, this year could be moderate in terms of returns, but the longterm India growth story still remains intact.

LIFE GOALS. DONE.
