

August 2022

Amidst an environment of global growth slowdown, Indian macro-economic fundamentals are better placed on a relative basis. Though India's growth is also expected to witness deceleration in the coming fiscal year, it remains one of the fastest growing major economies in the world. Inflation in India is elevated and is only marginally higher than the RBI threshold band, which compares favourably to other developed countries where inflation is hovering at multi-decade highs. Also, the monsoon season has been normal this year, and this augurs well for controlling food inflation levels in the country.

LIFE GOALS. DONE.
